

Pedestrian Delineation Device

Navigator Barricade Features:

- Designed to assist pedestrians with a safe and accessible route through construction work zones or other public rights-of-way that have been temporarily altered.
- Designed to meet the criteria outlined under the Americans with Disabilities Act (ADA), "Draft Guidelines for Accessible Public Rights-of-Way"
- Provides continuous delineation
- Hardware free and no assembly tools required - Units simply snap together
- Disassembled units are stackable and compact for easy transportation and storage
- Low cost per lineal foot
- Lightweight design for ease of mobility yet stable when deployed
- Plastic components are UV stabilized for longer life and rubber components made of recycled rubber

The Navigator Barricade is adaptable to meet diverse and unique work zone conditions with virtually unlimited set-up configurations. Installers can quickly and easily create customized safe pedestrian walkways through potentially dangerous work zones.
